

SAP Certification- Data Integrator XI R2

Blueprint offers a unique service to provide guidance on SAP Data Integrator certifications.

The first step in becoming fully certified is to attend our XIR2 Data Integrator training.

Then, with effective skills transfer, practical workshops and inspiring trainers, we'll ensure that you have all the skills you need to complete your certification exams.

Why Get Certified?

The business intelligence (BI) industry is rapidly changing. In a competitive marketplace, you need to differentiate yourself. Stay on top of your skills by becoming an SAP Application Associate – SAP BusinessObjects Data Integrator XI R2. Whether you are an individual and want to upgrade your skills or an IT manager seeking to certify your staff or hire qualified talent, this certification program will enhance your skills proficiency and knowledge.

Examination Overview

This exam will measure your knowledge of SAP BusinessObjects Data Integrator starting with understanding Data Integrator concepts through to managing the Data Integrator environment and profiling data. It will also test your skills in applying performance tuning and sizing methods, implementing complex design methodology, deploying Data Integrator using best practices and troubleshooting and supporting Data Integrator.
